

Workshop

Air Sensing: Citizen Science on Air Quality

Friday, 18 November
BUND e.V., Am Köllnischen Park 1, 10179 Berlin

This air sensing group meeting intends to bring together those interested in exchanging on how to bring forward participatory sensing of air pollution and how to facilitate exchange between different initiatives in this field.

Agenda:

11:00	Welcome & Introduction <i>Wiebke Herding (ON:SUBJECT) & Arne Fellermann (BUND e.V.)</i>
11:15	Roundtable of initiatives and projects working on air quality and participatory sensing
12:00	Current developments in official monitoring networks in Germany and the EU <i>Ute Dauert (German Environmental Agency, UBA)</i>
13:00	Lunch
14:00	How can citizens use the data gathered to make an impact on air quality? What do campaigners need to change policy? How can we make it easy, accessible and fun to set up and operate air quality sensors?
15:00	Break
15:20	What is a good measurement? How can citizen science improve data quality, data visualisation and data sharing? How can we make sense of the data we gather?
16:15	Conclusion and outlook: How to improve coordination between projects and how to facilitate use of acquired data?
17:00	End of the workshop

For registration please use this link: <https://goo.gl/forms/kyN9BxMECJqPdDmS2>

There will also be the possibility to participate virtually.

The project hackAIR has received funding from the European Union Horizon 2020 Research and Innovation Programme under Grant Agreement No. 688363.
